INTRODUCTION

This report provides freight statistics and related data by individual stations.

To explain briefly, using Denver, Colorado, as an example, the information for an individual station represents the following:

Page 43 Colorado Division

<u>Station No.</u>	<u>Forwarded Cars</u>	<u>Received Cars</u>
20977 Denver	2,933 (a)	36,949 (c)
FR/TO CONN	27,016 (b)	33,593 (d)

- (a) Local (To BN and/or family lines) and Interline Forwarded from Denver (origination station)
- (b) Interline Received and Intermediate carloads - Denver (on-coming junction)
- (c) Local (To BN and/or family lines) and Interline Received carloads received at Denver (destination station)
- (d) Interline Forwarded and Intermediate carloads - Denver (off-going junction)

For purposes of this report, each of the columns, forwarded and received, includes all BN and family lines' revenues, as the total revenues of each shipment are credited to both the beginning station (forwarded) and ending station (received) of a move on the BN and/or family line.

When two or more family lines are involved in a shipment, only the BN family beginning and ending stations are credited with revenues. Shipments which junction between BN family lines are not included in the "FR/To Conn" totals. The "FR/To Conn" totals include only traffic interchanged with roads other than BN family lines.
