How To Find Items On This Website

This site uses the SharePoint operating system which lets you locate items using column filtering. This feature lets you show only items in a column that match the selection you make at the top of the column. Here are the detailed instructions:

- Open the database listing the items from which you want to locate a specific item.
- Put your cursor over the header at the top of the column you want to filter, such as RR to select the railroad that has the data you seek.
